

Free / Low Cost Fax Services For Sending Faxes

If you don't own a fax machine, you can send secure faxes over the internet. This is different from emailing as it is more secure (you upload your document through a website). Most e-fax services will provide a 30-day free trial for sending and receiving faxes. Most require a monthly plan or set-up fees.

These plans have no monthly fees and no plans to buy. They are best if you don't need to receive faxes and rarely send faxes.
